

GroupLab aim point test card: 100 yards

Print at Actual size / 100 percent (not Fit to page). Check the 2 in bar at the bottom measures 2 in.
At 100 yd, for each scope and magnification, score each letter on the score sheet (page 2):
0 cannot see the center, 1 can see it but cannot center on it confidently, 2 can center confidently.
A to H fit the current 1.5 in bull spacing. I needs a larger spacing. This card is for looking, not for GroupLab analysis: it has no markers.

A

Current GroupLab bull (control)
1.0 in rings, 0.03 in lines, 0.10 in dot

B

Same bull, bold lines
1.0 in, 0.08 in lines, 0.22 in dot

C

Black diamond, white center
1.25 in point to point, 0.36 in center

D

Black square, white cross
1.0 in square, 0.06 in white lines

E

Black square, white center
1.0 in, 0.36 in center, 0.10 in dot

F

Square outline, center dot
1.0 in, 0.10 in line, 0.20 in dot

G

Open cross, no center
0.10 in arms from 0.2 to 0.6 in

H

Four pointers
tips 0.2 in from center

I

Large bull (fewer per page)
2.0 in, 0.6 in center, 0.15 in dot

Aim point score sheet: 0 cannot see center, 1 see but not center, 2 center confidently

Card at 100 yd unless a row says otherwise. Score only at magnifications your scope has; 25x on all three high power scopes is the like-for-like glass comparison.

Scope	Mag	Light / mirage	A	B	C	D	E	F	G	H	I
Razor HD Gen III 6-36x56											
	10x										
	18x										
	25x										
	36x										
DNT TheOne 7-35x56											
	10x										
	18x										
	25x										
	35x										
Strike Eagle 5-25x56											
	10x										
	18x										
	25x										
PLxC 1-8x24 (FFP)											
	4x										
	6x										
	8x										
Friend's scope:											
	____x										
	____x										
	____x										

Also note: time of day, sun direction, and which letter you would choose to shoot load development on.

If there is time: 3 shots at A and 3 at your favorite, same rifle and load. A first look, not a proof.

Friend's scope make, model, magnification range, focal plane:

Notes:
