

GroupLab aim point test card: 100 yards

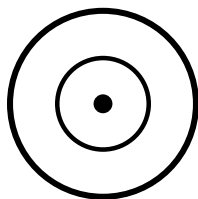

Print at Actual size / 100 percent (not Fit to page). Check the 2 in bar at the bottom measures 2 in.

At 100 yd, for each scope and magnification, score each letter on the score sheet (page 2):

0 cannot see the centre, 1 can see it but cannot centre on it confidently, 2 can centre confidently.

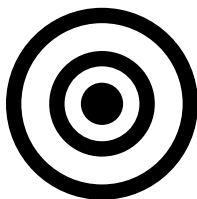

A to H fit the current 1.5 in bull spacing. I needs a larger spacing. This card is for looking, not for GroupLab analysis: it has no markers.

A

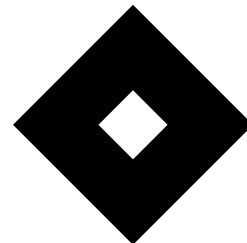

Current GroupLab bull (control)
1.0 in rings, 0.03 in lines, 0.10 in dot

B

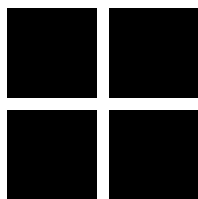

Same bull, bold lines
1.0 in, 0.08 in lines, 0.22 in dot

C

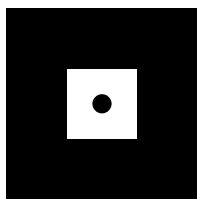

Black diamond, white centre
1.25 in point to point, 0.36 in centre

D

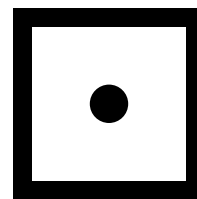

Black square, white cross
1.0 in square, 0.06 in white lines

E

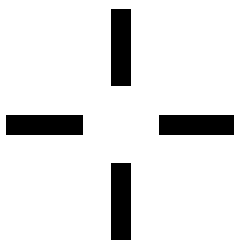

Black square, white centre
1.0 in, 0.36 in centre, 0.10 in dot

F

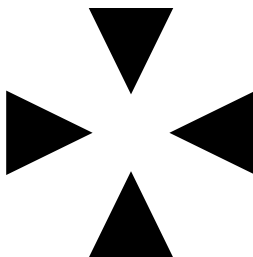

Square outline, centre dot
1.0 in, 0.10 in line, 0.20 in dot

G

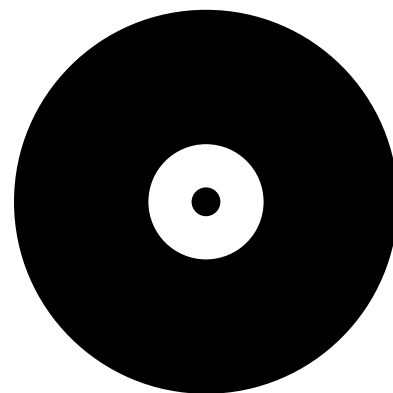

Open cross, no centre
0.10 in arms from 0.2 to 0.6 in

H

Four pointers
tips 0.2 in from centre

I

Large bull (fewer per page)
2.0 in, 0.6 in centre, 0.15 in dot

Score sheet (0 cannot see centre, 1 see but not centre, 2 centre confidently)

Scope	Mag	Light / mirage	A	B	C	D	E	F	G	H	I	
Razor HD Gen III 6-36x56	10x											
	18x											
	max											
DNT TheOne 7-35x56	10x											
	18x											
	max											
Strike Eagle 5-25x56	10x											
	18x											
	max											
Friend's scope:	10x											
	18x											
	max											

If there is time: shoot 3 shots at A and 3 at your favourite, same rifle, same load.

Photograph or scan this page after. Three shots only tells you a lot if the difference is large; it is a first look, not a proof.

Notes:
